

## **Milena Krogsgaard: “How to use AI and data appropriately and lawfully?”**

In AI projects almost everything is about data and compliance. In order to ensure a successful AI-project it is important to apply correct, complete and representative data. Data must also be used in appropriate, responsible and lawful way. Thus, every AI project must be based on deep understanding of the legal restrictions and possibilities in the data protection law, the intellectual property law and the coming AI Act. This presentation will therefore focus on the basic prerequisites for compliance in your AI project.
